Forms Migration

➤ Centralized structures

- Entrance to the system and usage of the program are monitored by the system.
- The log of every updated or deleted data is kept in the system.
- Unique template is applied in all screen designs for ergonomics.
- Limited access is provided by IP restriction.
- Menu grants are managed by user profile and by user grants. Every menu grant are shaped on an individual basis for users, branch Office and department.
- Multi-language support can be set parametrically in applications.
 - Labels,
 - Hints,
 - Customized Messages
 - List-boxes, Button names, etc.
- Forms runtime user sessions can be monitored in detail via Toad, Pl/Sql Developer, etc.
- All entries into each application can be exported to an excel file.
- Country codes are used in ISO ALPHA-2, ISO ALPHA-3 and ISO ALPHA-2, ISO-UNM49 format
- Maintenance Cost reducing by time saving, user cases are automatically captured for stored procedures/packages/functions and test scripts are generically generated

➤ Developer Friendly Forms Templates

☐ Time-saving standard structures

- Mandatory and Optional item entries can be managed simply by pre-defined visual attributes
- List-Items filled dynamically from look-up table
- User can manage all database, forms and user defined messages with only one procedure.
- Date item is integrated through the date button on canvas
- With simple pl/sql code in stored procedures test scripts for debugging database procedure, package and function are created dynamically.

➤ Grant Management

- User creation and password Management
- Menu Creation
- User profile creation for application and menus.
- User management by profiles or applications
- Data Manipulation grant on application can be set for each user
- User base IP restriction
